

Reaching

What if I could discover a cure for a life-threatening disease?

*How can I decrease the cost of diabetes care...
...AND make it easier for diabetics to stay healthy?*

*What if I could develop a product to reduce
post-operative pain?*

These are the kind of
questions that keep
us up at night...

...and get us out of
bed in the morning.

Performance for life. Abbott Laboratories.

Healing

*Every time we see our products used to help a patient,
we're reminded what kind of business we're really in.*

We love those days.

Performance for life. Abbott Laboratories.

Perfecting

*When it comes to health care,
is the difference between
acceptable and excellent
worth the effort?*

We think so.

Achieving

*What's possible when 70,000 people with
diverse cultural, national, and
family backgrounds, skills and
life experiences work together
toward one common vision?*

Anything.

*Sharon Larkin, mother of two
active boys and Divisional Vice
President of Human Resources.*

Exceeding

From R&D investment, to sales training,

to the way we package our products...

We're working hard to exceed your expectations

of a health care company.

Because in the drive for excellence,
there are no minor details.

Performance for life. Abbott Laboratories.
